

## Protecting Data Centres

### CONNECTING YOUR BUSINESS TO THE TECHNOLOGY YOU NEED

As security challenges become more demanding, it is essential that protective security systems are effective and trustworthy. In an age of convergence and advanced biometric scanning c-hq provides integrated, layered security solutions that are cost efficient, proportional and scalable.

Working in line with CPNI guidelines, c-hq provides advice and guidance for the security of people and property, critical national infrastructure and the high security estate.

An effective protection system protects more than just assets, it protects a business.

### ASSURANCE

c-hq provide our clients with the full spectrum of security assurance in line with current CPNI guidelines.

c-hq maintains constant market research ensuring that resilient and robust technology is deployed to provide the very best solutions.

### TECHNOLOGY CONSULTING PROVIDES A TOTAL END TO END SOLUTION

c-hq provides effective technical advice based on the understanding of your threats, the associated hazards and their potential.

This information is used for the basis of risk analysis and the design of a complete and integrated solution to manage those risks.

c-hq will provide support in the development and the design of your system. Producing schematics, schedules, interaction matrices and configuration tables as well as compliancy documentation and commercial selection.

We believe that our business is differentiated from the competition by its unique blend of in depth technical and commercial acumen, coupled with a proactive approach to customer account management based on specific experience within each market. Our balanced approach provides many benefits to the end user.

Our in depth technical knowledge of the arena provides our customers with robust information that helps them deploy suitable and proportional technical and procedural solutions. It is our belief that our ability to provide an 'end to end' Consultancy Solution takes away the significant risks associated with a fragmented approach to delivering Security Projects.
