

# Digital Pace Recording, IAM & Custody Security Systems

A TRUSTWORTHY TECHNOLOGY PARTNER TO THE POLICE FORCE DELIVERING INNOVATION WITHOUT RISK IN DEMANDING FINANCIAL TIMES

As security challenges become more demanding, it is essential that protective security systems are effective and trustworthy. In an age of convergence and advanced electronic security c-hq provides integrated, layered security solutions that are cost efficient, proportional and scalable.

Working in line with HOSDB guidelines, c-hq provides advice and guidance for the security of people, property, custodial, CNI and the high security estate.

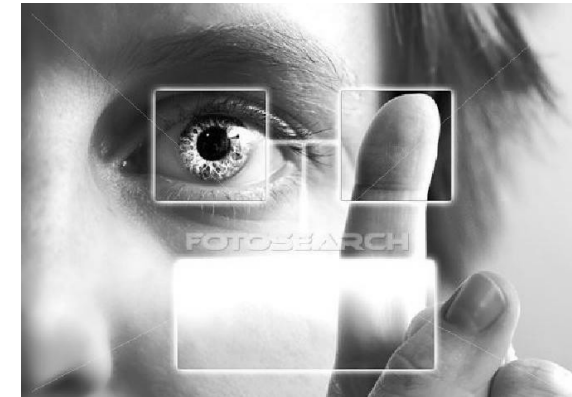

## IDENTITY AND ACCESS MANAGEMENT (IAMS)

With IAM implementation already underway by Pathfinder Forces c-hq are able to offer advice and support to define an integrated technology solution that addresses the physical and logical access control management to your buildings and network infrastructure. Our services include advice on card selection, reader technology FIPS compliancy and integration with your IT systems. More often than not this project can involve substantial developments in the existing access control system deployed, for example. This is another area where c-hq are able to help define the current and future needs for force wide deployment.

## flexible solutions for your operational needs

PACE Recording & Data Management  
IAM Physical & Logical Access  
CUSTODIAL Security and Evidential Data

## CUSTODIAL SECURITY SYSTEMS

The critical requirements on systems deployed within Custody Suites are some of the most demanding within the security industry. Technology needs to support the Police in their everyday activities with minimum input. Systems need to be easy to use in their operation and must provide unhindered authorized access to information and images 24/7. Full audit trails need to be maintained and archive facilities need to be proportionate and accessible. Systems need to integrate within a simple -easy to deploy and maintain - infrastructure. Our experience has been built on landmark Custody projects within UK Police Force and we are able to share this experience and lessons learnt to the Police Community, for the benefit of all.

## ABOUT C-HQ SECURITY SERVICES

c-hq provides effective technical advice based on the understanding of your threats, the associated hazards and their potential. This information is used for the basis of risk analysis and the design of a complete and integrated solution to manage those risks.

c-hq will provide support in the development and the design of your system. Producing schematics, schedules, interaction matrices and configuration tables as well as compliancy documentation and commercial selection. We believe that our business is differentiated from the competition by its unique blend of in depth technical and commercial acumen, coupled with a proactive approach to customer account management based on specific experience within each market.

Our balanced approach provides many benefits to the end user. Our in depth technical knowledge of the arena provides our customers with robust information that helps them deploy suitable and proportional technical and procedural solutions. It is our belief that our ability to provide an 'end to end' Consultancy Solution takes away the significant risks associated with a fragmented approach to delivering Security Projects.

## DIGITAL PACE RECORDING

The PACE Recording technology is about to undergo a significant change towards a fully digital solution. The benefits of such a move are equally significant. Numerous companies and solutions are being presented to the UK Police Force on a daily basis and the NPIA are about to issue guidance in this area. c-hq are able to offer extensive experience and guidance to help the Police Forces of England & Wales to define a strategy and solution that addresses individual needs, whilst delivering immediate savings over an analogue tape or DVD based system. Our services range from developing an initial concept through to tender preparation and supplier selection. With such a wide range of existing and future technology emerging c-hq are able to assist and support the Police in making an informed and robust decision that delivers immediate value, business efficiencies, but most importantly, provides a route to enhanced interview investigations
